• CONDITIONS OF USE FOR THE PRODUCT •

(1) Mitsubishi programmable controller ("the PRODUCT") shall be used in conditions;
   i) where any problem, fault or failure occurring in the PRODUCT, if any, shall not lead to any major or serious accident; and
   ii) where the backup and fail-safe function are systematically or automatically provided outside of the PRODUCT for the case of any problem, fault or failure occurring in the PRODUCT.

(2) The PRODUCT has been designed and manufactured for the purpose of being used in general industries.

MITSUBISHI SHALL HAVE NO RESPONSIBILITY OR LIABILITY (INCLUDING, BUT NOT LIMITED TO ANY AND ALL RESPONSIBILITY OR LIABILITY BASED ON CONTRACT, WARRANTY, TORT, PRODUCT LIABILITY) FOR ANY INJURY OR DEATH TO PERSONS OR LOSS OR DAMAGE TO PROPERTY CAUSED BY the PRODUCT THAT ARE OPERATED OR USED IN APPLICATION NOT INTENDED OR EXCLUDED BY INSTRUCTIONS, PRECAUTIONS, OR WARNING CONTAINED IN MITSUBISHI'S USER, INSTRUCTION AND/OR SAFETY MANUALS, TECHNICAL BULLETINS AND GUIDELINES FOR the PRODUCT.

("Prohibited Application")

Prohibited Applications include, but not limited to, the use of the PRODUCT in;
- Nuclear Power Plants and any other power plants operated by Power companies, and/or any other cases in which the public could be affected if any problem or fault occurs in the PRODUCT.
- Railway companies or Public service purposes, and/or any other cases in which establishment of a special quality assurance system is required by the Purchaser or End User.
- Aircraft or Aerospace, Medical applications, Train equipment, transport equipment such as Elevator and Escalator, Incineration and Fuel devices, Vehicles, Manned transportation, Equipment for Recreation and Amusement, and Safety devices, handling of Nuclear or Hazardous Materials or Chemicals, Mining and Drilling, and/or other applications where there is a significant risk of injury to the public or property.

Notwithstanding the above, restrictions Mitsubishi may in its sole discretion, authorize use of the PRODUCT in one or more of the Prohibited Applications, provided that the usage of the PRODUCT is limited only for the specific applications agreed to by Mitsubishi and provided further that no special quality assurance or fail-safe, redundant or other safety features which exceed the general specifications of the PRODUCTs are required. For details, please contact the Mitsubishi representative in your region.

</table>

Note: The above manuals are stored on the CD-ROM of the corresponding software packages in PDF format.
Any of the manuals is available separately in printed form. Please indicate its manual number (model
code) in the above list, when ordering the printed manual.

NOTICES

- We do not guarantee the commercially-available Windows-based software products that have been introduced in this manual.
- We hold the copyrights of this software package.
- No part of this manual may be transcribed or duplicated in any form without prior permission by Mitsubishi Electric Corporation.
- We have attempted to cover all the revisions of software and hardware, but this manual may not contain the latest revisions.
- We assume that one software package will be used on one personal computer.
- We permit the user to use this software package (including this manual) based on the Software License Agreement.
- We are not liable for consequences or influences due to this software package (including this manual).
- The specifications of this software package and the descriptions in this manual may be altered in future without prior notice.
## GENERIC TERMS AND ABBREVIATIONS

Unless otherwise stated, this manual uses the following abbreviations and terms for the explanation of MX Component.

<table>
<thead>
<tr>
<th>Generic Term/Abbreviation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>MX Component</strong></td>
<td>Generic product name for SWnD5C-ACT-E and SWnD5C-ACT-EA (n: version) -EA means a volume-license product.</td>
</tr>
<tr>
<td><strong>Windows® 7</strong></td>
<td>Generic term for Microsoft® Windows® 7 Starter Operating System, Microsoft® Windows® 7 Home Premium Operating System, Microsoft® Windows® 7 Professional Operating System, Microsoft® Windows® 7 Ultimate Operating System, and Microsoft® Windows® 7 Enterprise Operating System. Note that the 32-bit version is designated as &quot;32-bit Windows® 7&quot;, and the 64-bit version is designated as &quot;64-bit Windows® 7&quot;.</td>
</tr>
<tr>
<td><strong>PC CPU module</strong></td>
<td>Abbreviation for MELSEC-Q series corresponding PC CPU module (CONTEC CO., LTD. make)</td>
</tr>
<tr>
<td><strong>Personal computer</strong></td>
<td>Generic term for PC CPU module and IBM-PC/AT compatible Personal computer.</td>
</tr>
<tr>
<td><strong>1-license product</strong></td>
<td>Abbreviation for MX Component 1-license product</td>
</tr>
<tr>
<td><strong>Volume license product</strong></td>
<td>Abbreviation for MX Component volume license product</td>
</tr>
</tbody>
</table>
The MX Component consists of the following products.

<table>
<thead>
<tr>
<th>Type</th>
<th>Product Name</th>

</table>

*1: The number of License agreements, which is included with the product, is equivalent to that of licenses.
1 GENERAL DESCRIPTION

This manual explains the system configuration, installation and uninstallation procedures and manual browsing method of MX Component which operates on Windows®.
2 SYSTEM CONFIGURATION

2.1 System Configuration

The following figure shows the system configuration.

![System Configuration Diagram]

**POINT**
It is illegal to use this product on two or more personal computers. You must not use this product on any other personal computer than one specified in Section 2.2 Operating Environment.
### 2.2 Operating Environment

The following table summarizes the operating environment for MX Component.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computer</td>
<td>IBM PC/AT compatible personal computer where the OS operates.</td>
</tr>
<tr>
<td>PC CPU module</td>
<td>MELSEC-Q series compatible PC CPU module (CONTEC CO., LTD. make)</td>
</tr>
<tr>
<td>Required memory</td>
<td>32MB or more *2</td>
</tr>
<tr>
<td>Hard disk free space</td>
<td>100MB or more</td>
</tr>
<tr>
<td>Disk drive</td>
<td>CD-ROM disk drive</td>
</tr>
<tr>
<td>Display</td>
<td>Resolution 800 x 600 pixels or higher (1024 x 768 pixels or higher for Windows Vista).</td>
</tr>
</tbody>
</table>

*1: Pentium® 150MHz or more is recommended for the use of Windows® Me, Pentium® 300MHz or more for the use of Windows® XP, and 1GHz or more is recommended for the use of Windows Vista® and Windows® 7.

*2: 64MB or more is recommended for Windows® 2000 Professional, 128MB or more is recommended for Windows® XP, 1GB or more is recommended for Windows Vista® and 32-bit Windows® 7, and 2GB or more is recommended for 64-bit Windows® 7.

*3: Service Pack 3 or more is needed for the use of Windows NT® Workstation 4.0.

*4: MX Component cannot be used in the XP compatibility mode.
<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Programming language</strong></td>
<td><strong>Development software</strong></td>
</tr>
<tr>
<td>VBScript *6, *7</td>
<td>Text editor and commercially available HTML tool</td>
</tr>
</tbody>
</table>

*5: User programs created in the English environment may be used in the English environment only. They cannot be used in the Japanese environment.

*6: To operate VBScript, use Internet Explorer (version 5.00.2919.6307 or later).

*7: When Windows® Me or Windows® XP Home Edition is used, the ASP function is unusable.

*10: For Visual Studio® 2010, Windows® XP Service Pack 3, Windows® Vista® Service Pack 2 or higher, or Windows® 7 or later is required.

*11: When using Excel 2002 or Access 2002 on Windows® 7, Windows® XP Service Pack 3 or later is required.

*14: For 32-bit Excel 2010 and 32-bit Access 2010, Windows® XP Service Pack 3, Windows® Vista® Service Pack 1 or higher, or Windows® 7 or later is required.

64-bit Excel 2010 and 64-bit Access 2010 are not supported.
### POINT

1. Instruction for use of the online manual
   - Use with addition of personal computer memory ensures comfortable operation.

2. Instruction for use of the PDF data
   - Use with addition of personal computer memory ensures comfortable operation.

3. When Windows® XP, Windows Vista® or Windows® 7 is used, the following new functions cannot be used.
   - If any of the following new functions is used, this product may not operate normally.
     - Start of application in Windows® compatible mode
     - Fast user switching
     - Remote desktop
     - Big fonts (Details setting of Screen properties)
   - 64-bit Windows® XP and 64-bit Windows Vista® are not supported.

4. When Windows® 7 is used, the following new functions cannot be used.
   - Windows XP Mode
   - Windows Touch

5. When creating a user program, select "x86" (32 bits) "Target CPU".
3 INSTALLATION AND UNINSTALLATION

This chapter provides how to install and uninstall MX Component.

3.1 Installation

3.1.1 Installing procedure

Install MX Component in the following procedure.

Install the product.
- Register your name and company.
- Register the product ID.

Refer to Section 3.1.2.

Confirm the icon.
- Check that the product has been installed correctly.

Refer to Section 3.2.

Completion
3.1.2 Installation

The following is how to install MX Component.

**POINT**

1. Terminate all the other applications running under Windows™ before installation.
2. The installer may not work normally because the update program of operating system or other companies’ software such as Windows Update and java update may start automatically. Please install the driver after changing the setting of the update program not to start automatically.
3. When the OS is Windows NT™ Workstation 4.0, Windows™ 2000 Professional, Windows™ XP, Windows Vista™ or Windows™ 7, log on as a user with administrator privileges.

(1) Installing the product

1. Start Windows™ after powering on the personal computer.

2. Start Explorer and click the drive in which the disk has been inserted.

   Double-click "setup.exe".

   To display Explorer, right-click "Start" and select "Explorer".

   * When user account control is enabled, the following screen appears.

   Click "Allow" or Yes.

   **Windows Vista™**

   **Windows 7**
3) If the message shown on the left appears, click Cancel, uninstall MX Component, and then reinstall it.

REMARK
If SW0D5C-ACT-E has been installed in the personal computer where MX Component Version 3 will be installed, installing MX Component Version 3 without uninstalling SW0D5C-ACT-E will delete the licenses of SW0D5C-ACT-E.

If the screen shown on the left appears, perform operation in accordance with the instructions given in (a) of "(2) When message appears at start of installation".
After the operation is over, restart installation operation.

If the screen shown on the left appears, perform operation in accordance with the instructions given in (b) of "(2) When message appears at start of installation".
After the operation is over, restart installation operation.

4) As the screen shown on the left appears, make sure that all applications have been closed and click OK. If the applications are running, close all running applications.

5) As the screen shown on the left appears, read the information and click Next>.
6) Enter the name and company name, and then click Next>.

7) Confirm the registered name and company name. If they are correct, click Yes. To make a change, click No to return to the previous screen.

8) Enter the product ID and click Next>.
   The product ID is printed on the License certificate.

9) Specify the installation destination folder.
   If the displayed installation destination folder is correct, click Next>.
   If you change the destination folder, click Browse and specify a new drive and folder.
* When the following screen appears, click [Install]. This screen may appear in several times.

The either of the following screens may appear behind the Windows Security screen. Then, press the [Alt] + [Tab] keys to bring it to the front. Click [OK] on the following screens.

* For Windows® XP, the following screen may appear at installation. Click [Continue Anyway]. We checked operations in Windows® XP (Problems never occur after installation.) The following screen may appear behind another screen. Then, press the [Alt] + [Tab] keys to bring it to the front.
10) This completes installation. Click **OK**.

* When the following screen appears, regardless of the installation result, select "This program installed correctly".

Do not select "Reinstall using recommended settings", because the installer installs an incorrect module. If it was selected by mistake, reinstall MX Component in accordance with the POINT on the next page.

11) When the screen shown on the left appears, restart Windows®.

**REMARK**

When Windows® XP Professional, Windows Vista® or Windows® 7 is used, the icons are registered to [Start] - [All Programs] - [MELSOFT Application].
Note the following instructions when the installer is started from the hard disk drive of the personal computer.

If the "Program Compatibility Assistant" screen appears after the installation, select "This program installed correctly".
If "Reinstall using recommended settings" is selected by mistake, 'Windows XP compatibility mode' is set automatically.
Disable the 'Windows XP compatibility mode' by following the procedure described below, and perform the reinstallation.

1. Right-click on the setup.exe icon of the installation target in the Windows explorer, and open the "setup Properties" screen.
2. Select the <<Compatibility>> tab and click [Show settings for all users].
3. Uncheck the "Run this program in compatibility mode for:" check box of compatibility mode in the <<Compatibility for all users>> tab and click [OK].
(2) When message appears at start of installation
When the installation of this product starts, the "This package is not in proper operating environment" message appears, disabling normal completion of installation.
In such a case, close all applications and perform the (a) or (b) operation.

(a) Installation of dcom95.exe or AXDIST.exe
Execute dcom95.exe or AXDIST.exe provided for MX Component.
Install MX Component after executing the exe file and restarting the personal computer.
Execute the exe file on the corresponding operating system as follows.

<table>
<thead>
<tr>
<th>OS</th>
<th>File name</th>
</tr>
</thead>
<tbody>
<tr>
<td>Microsoft® Windows® 95 Operating System</td>
<td>dcom95.exe</td>
</tr>
<tr>
<td>Microsoft® Windows® 98 Operating System</td>
<td>AXDIST.exe</td>
</tr>
<tr>
<td>Microsoft® Windows NT® Workstation Operating System Version 4.0</td>
<td>AXDIST.exe</td>
</tr>
</tbody>
</table>

(dcom95.exe and AXDIST.exe are in the "Update" folder on CD-ROM.)

(b) Installation of EnvMEL
Execute "EnvMEL/Setup.exe" within the product (CD-ROM).
Then, install the product.
* When user account control is enabled, the following screen appears. Click "Allow" or "Yes".

After executing the above exe file, reinstall the product. If this product is not installed properly at this time, reboot the personal computer.

* When the following screen appears, regardless of the installation result, select "This program installed correctly".
Do not select "Reinstall using recommended settings", because the installer installs an incorrect module.
3.2 Registered Icons

Installation of MX Component registers the following icons to [Start] - [Programs] - [MELSOFT Application] - [MX Component].

**REMARK**

When Windows® XP, Windows Vista® or Windows® 7 is used, the icons are registered to [Start] - [All Programs] - [MELSOFT Application].

<table>
<thead>
<tr>
<th>Icon</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Icon]</td>
<td>PLC Monitor Utility</td>
<td>Starts the PLC monitor utility.</td>
</tr>
<tr>
<td>![Icon]</td>
<td>Communication setup utility</td>
<td>Starts the communication setup utility.</td>
</tr>
</tbody>
</table>
3.3 Uninstallation

The following is how to uninstall MX Component.

1) Select and double-click "Add/Remove Programs" in the Control Panel.
   On Control Panel, select [Start] - [Settings] - [Control Panel].

   **REMARK**
   When using Windows XP, select "Add/Remove Programs" from the Control Panel.
   To display the Control Panel, select [Start] - [Control Panel].
   Select "Uninstall a program" on the Control Panel in Windows Vista® or Windows® 7.

2) Select "MX Component". And then click [Add/Remove …].

   **REMARK**
   The screen shown on the left is the one for Windows® 98.
   The displayed screen varies with the OS.
   Depending on the used OS, perform the following operation.

   < Windows® 2000 Professional or Windows® XP >
   (a) Click "Change or Remove programs".
   (b) Select "MX Component".
   (c) Click Change/Remove .

   < Windows Vista® or Windows® 7 >
   Select "MX Component" on the "Uninstall or change a program" screen, and click "Uninstall/Change".

   * When user account control is enabled, the following screen appears.
     Click [Continue] or [Yes].

   < Windows Vista® >  < Windows® 7 >
3) Check whether you will remove the software package or not.
When uninstalling it, click [Yes].
Uninstallation starts.
When not uninstalling it, click [No].
This returns to the preceding screen.

* Components indicate the icons and files installed.

4) If the screen shown on the left appears, click [No To All].
The software package of only MX Component is removed.
If you click [Yes] or [Yes To All], the shared file of the Windows® compatible MELSOFT software will be removed and the other software packages may not operate properly.

5) When the message of finished removal appears, click [OK].
If the screen warns of files that were not deleted, restart the personal computer.

POINT
Uninstalling deletes all the settings within “Communication Setup Utility”.
To avoid this, export the file storing the settings.
3.4 Installing the USB Driver

When Windows® 2000 Professional, Windows® XP, Windows Vista® or Windows® 7 is used, the USB driver must be installed to make CPU USB communication. The following is the USB driver installation procedure.

### POINT

If the USB driver cannot be installed, check the following setting.

1. **When Windows® 2000 Professional is used**
   - If you have selected "Block-Prevent installation of unsigned files" after [Control Panel] - [System] - [Hardware] - [Driver Signing], the USB driver may not be installed.
   - Select "Ignore-Install all files, regardless of file signature" or "Warn-Display a message before installing an unsigned file" for [Driver Signing], and install the USB driver.

2. **When Windows® XP is used**
   - If you have selected "Block-Never install unsigned driver software" after [Control Panel] - [System] - [Hardware] - [Driver Signing], the USB driver may not be installed.
   - Select "Ignore-Install the software anyway and do not ask for my approval" or "Warn-Prompt me each time to select an action" for [Driver Signing], and install the USB driver.

### 3.4.1 When Windows® 2000 Professional is used

The following indicates the procedure for installing the USB driver when using Windows® 2000 Professional.

1) The screen shown on the left appears when the personal computer is connected to the programmable controller CPU with a USB cable. Click [Next>].

(To the next page)
2) Select "Search for a suitable driver for my device (recommended)" and click Next>.

3) Check "Specify a location" and click Next>.

4) As the screen shown on the left appears, set the MX Component installation destination "Easysocket\USBdrivers" and click Next>.

The left screen is an example when C:\MELSEC\Easysocket\USBdrivers is set.
If volume MELSOFT products have been installed, browse the installation destination of the first product.

5) The screen on the left appears to indicate completion of installation.
Click Finish to terminate installation.
3.4.2 When Windows® XP is used

The following indicates the procedure for installing the USB driver when using Windows® XP.

1) The screen shown on the left appears when the personal computer is connected to the programmable controller CPU with a USB cable. Select “Install from a list or specific location [Advanced]” and click Next > .

2) As the screen shown on the left appears, select “Include this location in the search”. Check “Include this location in the search” and set “Easysocket\USBDrivers” of the folder where MX Component was installed. After setting, click Next > . The left screen is an example when C:\MELSEC\Easysocket\USBDrivers is set. If volume MELSOFT products have been installed, browse the installation destination of the first product.

3) As the screen shown on the left appears, click Continue Anyway .

REMIEK
Though the screen shown on the left appears during installation of the USB driver, we have confirmed that the USB driver operates properly using Windows® XP. (No problem will occur after installation of the USB driver.) Click Continue Anyway to continue the installation of the USB driver.
4) The screen shown on the left appears to indicate completion of installation. Click [Finish] to terminate installation.
3.4.3 When Windows Vista® is used

The following shows installation procedure of USB driver when using Windows Vista®.

1) The screen shown on the left appears when the personal computer is connected to the programmable controller CPU with a USB cable. Select "Locate and install driver software (recommended)" and wait until searching ends.

* When user account control is enabled, the following screen appears. Click [Continue].

2) The screen shown on the left appears. Select "Browse my computer for driver software (advanced)".

3) The screen shown on the left appears. Set installation location of MX Component, "Easysocket\USBdrivers". Then, click [Next].

The left screen is an example when C:\MELSEC\Easysocket\USBdrivers is set. If multiple MELSOFT products have been installed, refer to the installation location of the first installed product.
4) The screen shown on the left appears. Select "Install this driver software anyway".

5) The screen shown on the left appears. Click Close.

6) The screen shown on the left appears when the installation ends. Click Close to exit.
3.4.4 When Windows® 7 is used

The following shows installation procedure of USB driver when using Windows® 7.

1) The message shown on the left appears when the personal computer is connected to the programmable controller CPU with a USB cable.

2) Select "System and Security" from the Control Panel.
   To display the Control Panel, select [Start] - [Control Panel].

3) The screen shown on the left appears. Select "Administrative Tools".

4) The screen shown on the left appears. Select "Computer Management".
5) Right-click "Unknown device" in the Windows Device Manager as shown left, and select "Update Driver Software…".

**REMARK**
If multiple "Unknown devices' exist therefore cannot be specified, right-click "Unknown device" as shown left and select "Properties". The "Unknown device", whose "Hardware Ids" is "USB\VID_06D3&PID_1800" on the <<Details>> tab of the properties screen, is the update target.

6) The screen shown on the left appears. Select "Browse my computer for driver software".
7) The screen shown on the left appears. Set installation location of MX Component, "Easysocket\USBdrivers". Then, click [Next>].

The left screen is an example when C:\MELSEC\Easysocket\USBdrivers is set. If multiple MELSOFT products have been installed, refer to the installation location of the first installed product.

8) The screen shown on the left appears. Click [Install].

9) The screen shown on the left appears. Click [Close].
10) "MITSUBISHI Easysocket Driver" is registered under "Universal Serial Bus controllers".
3.5 Updating the USB Driver

In Windows Vista® or Windows® 7, if MELSOFT incompatible with each operating system has been installed when MELSOFT compatible with each operating system is installed, upgrading the USB drivers is required.

The USB driver has the following two types:
• USB driver for programmable controller connection
• USB driver for GOT connection (used for the GOT transparent mode.)

(1) Procedure for updating the USB driver for programmable controller connection
(a) Checking method
Whether an update of the USB driver is required or not can be checked by its version.
Start the Windows Device Manager while the personal computer is connected to the programmable controller with USB, right-click "MITSUBISHI Easysocket Driver", and select "Properties".
Update is necessary if the version shown in the <<Driver>> tab of the properties screen is the following.
• Windows Vista® : "2.0.0.0" or earlier
• Windows® 7 : "3.0.0.0" or earlier
(b) Procedure for update

1) Connect the programmable controller to the personal computer with USB cable.

2) Start the Windows Device Manager, right-click "MITSUBISHI Easysocket Driver" as shown left, and select "Uninstall".

3) The warning dialog box as shown on the left appears. Check the "Delete the driver software for this device" check box, and click [OK].

4) Disconnect the USB cable and reconnect it to the same USB port after 5 seconds.

When using Windows Vista®, the following screen is displayed. Select "Ask me again later".

(To the next page)
5) Right-click "Unknown device" in the Windows Device Manager as shown left, and select "Update Driver Software...".

[REMARK]
If multiple ‘unknown devices’ exist therefore cannot be specified, right-click "Unknown device" as shown left and select "Properties". The "Unknown device", whose "Hardware Ids" is "USB\VID_06D3&PID_1800" on the "Details" tab of the properties screen, is the update target.

6) The left Windows confirmation dialog box appears. Select "Browse my computer for driver software".
7) The screen shown on the left appears. Set installed location of MX Component, "Easysocket\USBDrivers. Then, click Next. The left screen is an example when C:\MELSEC\Easysocket\USBDrivers is set. If multiple MELSOFT products have been installed, refer to the installation location of the first installed product.

8) The left Windows confirmation dialog box appears. Click Install.

9) The screen shown on the left appears. Click Close. The update is complete.
(2) Procedure for updating the USB driver for GOT connection
   (a) Checking method
   Reset the power on the GOT and start the Windows Device Manager while
   the personal computer is connected to the GOT with USB. If "MITSUBISHI
   GOT1000 USB Controller" is not displayed under "Universal Serial Bus
   controllers", but "Unknown device" is displayed under "Other devices", the
   device needs to be updated.
   The "Unknown device", whose "Hardware Ids" is
   "USB\VID_06D3&PID_01E0" on the <<Details>> tab of the properties
   screen, is the update target.

   (b) Procedure for update
   1) Connect the GOT to the personal computer with USB
   cable.

   2) Start the Windows Device Manager, right-click
   "Unknown device" as shown left, and select "Update
   Driver Software…".

(To the next page)
3) The screen shown on the left appears. Select "Browse my computer for driver software".

4) The screen shown on the left appears. Set the installed location "EZSocket\EZSocketGOT\Drivers" and click Next. The left screen is an example when C:\MELSEC\EZSocket\EZSocketGOT\Drivers is set. If multiple MELSOFT products have been installed, refer to the installation location of the first installed product.

5) The screen shown on the left appears. Click Close. This completes the update of driver software.
