A9GT-QBUSS type Bus connection

User’s Manual

Thank you for purchasing the MELSEC-GOT Series.

To ensure correct use of this equipment, please carefully read this manual prior to use.

---

Type: A9GT-QBUSS-U
Type Code: 1DM132
Manual Number: SH-4005 (1DM099)

---

The following manuals are relevant to this product. Refer to the following list and order the required manuals.

**Detailed Manual**
- A985GOT/A975GOT/A970GOT/A960GOT User’s Manual (Available as option)
- OT User’s Manual (Available as option)

**Relvant Manual**
- A985GOT/-V/A975GOT/A970GOT/A960GOT User’s Manual (Available as option)
- OT User’s Manual (Available as option)

---

**SAFETY PRECAUTIONS**

(Read these precautions prior to use.)

When using Mitsubishi equipment, thoroughly read this manual and the associated manuals introduced in this manual. Also pay careful attention to safety and handle the module properly.

These precautions apply only to Mitsubishi equipment. Refer to the CPU module user’s manual for a description of the PLC system safety precautions.

These **SAFETY PRECAUTIONS** classify the safety precautions into two categories: "DANGER" and "CAUTION".

**DANGER**

Procedures which may lead to a dangerous condition and cause death or serious injury if not carried out properly.

**CAUTION**

Procedures which may lead to a dangerous condition and cause superficial to medium injury, or physical damage only, if not carried out properly.

Depending on circumstances, procedures indicated by **CAUTION** may also be linked to serious results.

In any case, it is important to follow the directions for usage.

Store this manual in a safe place so that you can take it out and read it whenever necessary. Always forward it to the end user.

---

**INSTALLATION PRECAUTIONS**

**DANGER**

- Before mounting or dismounting this module to or from the GOT, always shut off GOT power externally in all phases. Not doing so can cause a module failure or malfunction.
- Before connecting the Bus connection cable to this module, always shut off GOT power and PLC CPU power externally in all phases. Not doing so can cause a malfunction.

**CAUTION**

- Use this module in the environment given in the general specifications of the GOT User’s Manual. Not doing so can cause an electric shock, fire, malfunction or product damage or deterioration.
- When installing this unit to the GOT, fit it to the connection interface of the GOT and tighten the mounting screws in the specified torque range. Undertightening can cause a drop, failure or malfunction. Overtightening can cause a drop, failure or malfunction due to GOT or screw damage.

---

**WIRING PRECAUTIONS**

**CAUTION**

- Insert and fit the bus connection cable into the connector of the module to be connected until it “clicks”. After fitting, check for looseness. Not doing so can cause a malfunction due to a connection fault.

---

**STARTUP AND MAINTENANCE PRECAUTIONS**

**DANGER**

- Do not change the switch setting during the be in operation. Doing so can cause a malfunction.
- Before starting cleaning, always shut off GOT power externally in all phases. Not doing so can cause a module failure or malfunction.

**CAUTION**

- Do not disassemble or modify any module. This will cause failure, malfunction, injuries, or fire.
- Do not touch the conductive areas and electronic parts of this module directly. Doing so can cause a module malfunction or failure.
- Always secure the cables connected to the module, e.g. run them in conduits or clamp them. Not doing so can cause module or cable damage due to dangling, moved or accidentally pulled cables or can cause a malfunction due to a cable contact fault.
- Do not hold the cable part when unplugging any cable connected to the module. Doing so can cause module or cable damage or a malfunction due to a cable contact fault.
- Before handling the unit, touch grounded metal or similar object to discharge the static electricity from the human body. Failure to do so may cause the unit to fail or malfunction.

**DISPOSAL PRECAUTIONS**

**CAUTION**

- Dispose of this product as industrial waste.

---

1. OVERVIEW

This User’s Manual describes the A9GT-QBUSS type Bus connection communication board (hereinafter, A9GT-QBUSS).

The A9GT-QBUSS is mounted on the A985GOT(V)/A975GOT/A970GOT/A960GOT (hereinafter, GOT) to PLC system of the Q Series via a bus.

The A9GT-QBUSS is used with the following system:
1) One GOT is connected to one PLC CPU; or
2) Used with the last GOT when two or more GOTs are connected to one PLC CPU. (Since this module has one interface.)

---

Q Series PLC

---

A9GT-QCNB type Bus extension connector box
(Necessary when the distance between GOT and the base unit exceed 13.2m, it is.)
When A9G-TQBUSS2 is used, it is necessary to set the increased number of stages and the I/O slot number. Setting is made in the "Setup" of the utility feature of GOT. Refer to the GOT-A900 Series User's Manual (Connection System Manual) for the configuration of the bus connection system and setting.

A9G-TQBUSS can be used only with QCPU (Q mode).

After opening the box, check that the following items are present.

1) The power supply of PLC CPU is the current consumed while turned on when the power supply of GOT is turned off. (The power supply is supplied from the GOT side and PLC CPU side.)

2) The power supply of GOT is the current consumed while turned on when the power supply of PLC CPU is turned off. (The power supply is supplied from the PLC CPU side.)

3) Tighten and fix the mounting screws (2 pcs.) of the A9G-TQBUSS within the specified torque range. (36 to 48N-cm) (3.2 to 4.2 lb-inch)

4) To remove the A9G-TQBUSS, reverse the installing procedure. To install the slot cover, also reverse the removing procedure. Here, securely install the slot cover, and securely tighten the mounting screws (2 pcs.) within the specified torque range. (36 to 48N-cm) (3.2 to 4.2 lb-inch)

4. INSTALLATION PROCEDURE

1) Loosen the mounting screws (2 pcs.) which secure the slot cover. Remove the slot cover. Save the removed slot cover.

2) Insert the protruding portion of the A9G-TQBUSS into the recessed portion of the GOT. Securely press the communication board against the GOT.
