SAFETY PRECAUTIONS

Always read these precautions before using the equipment.

1. Be sure to shut off all phases of the external power supply used in the equipment before installing or removing the unit from the external power supply.

2. Before connecting the bus connection cable to this unit, always shut off all phases of the external power supply used, and keep the unit in an electric shock-free state.

3. Do not put the unit in a location exposed to direct sunlight or hot or cold environments.

4. Do not subject the unit to excessive shocks or vibrations.

5. Do not disassemble or modify the unit in any way.

6. Do not subject the unit to damp or wet conditions.

7. Do not use the unit in an environment where lot of metallic dust is generated.

8. Do not expose the unit to radioactive radiation.

9. Do not subject the unit to high humidity or corrosive gases.

10. Do not expose the unit to high temperature.

11. Do not use a flammable aerosol near the unit.

12. Do not expose the unit to high magnetic fields.

13. Do not expose the unit to high electrical fields.

14. Do not expose the unit to high vibrations.

15. Do not expose the unit to high pressures.

16. Do not expose the unit to high altitudes.

17. Do not expose the unit to high voltages.

18. Do not expose the unit to high temperatures.

19. Do not expose the unit to high moisture levels.

20. Do not expose the unit to high humidity levels.

21. Do not expose the unit to high pressures.

22. Do not expose the unit to high temperatures.

23. Do not expose the unit to high moisture levels.

24. Do not expose the unit to high pressures.

25. Do not expose the unit to high temperatures.

26. Do not expose the unit to high moisture levels.

27. Do not expose the unit to high pressures.

28. Do not expose the unit to high temperatures.

29. Do not expose the unit to high moisture levels.

30. Do not expose the unit to high pressures.

31. Do not expose the unit to high temperatures.

32. Do not expose the unit to high moisture levels.

33. Do not expose the unit to high pressures.

34. Do not expose the unit to high temperatures.

35. Do not expose the unit to high moisture levels.

36. Do not expose the unit to high pressures.

37. Do not expose the unit to high temperatures.

38. Do not expose the unit to high moisture levels.

39. Do not expose the unit to high pressures.

40. Do not expose the unit to high temperatures.

41. Do not expose the unit to high moisture levels.

42. Do not expose the unit to high pressures.

43. Do not expose the unit to high temperatures.

44. Do not expose the unit to high moisture levels.

45. Do not expose the unit to high pressures.

46. Do not expose the unit to high temperatures.

47. Do not expose the unit to high moisture levels.

48. Do not expose the unit to high pressures.

49. Do not expose the unit to high temperatures.

50. Do not expose the unit to high moisture levels.

51. Do not expose the unit to high pressures.

52. Do not expose the unit to high temperatures.

53. Do not expose the unit to high moisture levels.

54. Do not expose the unit to high pressures.

55. Do not expose the unit to high temperatures.

56. Do not expose the unit to high moisture levels.

57. Do not expose the unit to high pressures.

58. Do not expose the unit to high temperatures.

59. Do not expose the unit to high moisture levels.

60. Do not expose the unit to high pressures.

61. Do not expose the unit to high temperatures.

62. Do not expose the unit to high moisture levels.

63. Do not expose the unit to high pressures.

64. Do not expose the unit to high temperatures.

65. Do not expose the unit to high moisture levels.

66. Do not expose the unit to high pressures.

67. Do not expose the unit to high temperatures.

68. Do not expose the unit to high moisture levels.

69. Do not expose the unit to high pressures.

70. Do not expose the unit to high temperatures.

71. Do not expose the unit to high moisture levels.

72. Do not expose the unit to high pressures.

73. Do not expose the unit to high temperatures.

74. Do not expose the unit to high moisture levels.

75. Do not expose the unit to high pressures.

76. Do not expose the unit to high temperatures.

77. Do not expose the unit to high moisture levels.

78. Do not expose the unit to high pressures.

79. Do not expose the unit to high temperatures.

80. Do not expose the unit to high moisture levels.

81. Do not expose the unit to high pressures.

82. Do not expose the unit to high temperatures.

83. Do not expose the unit to high moisture levels.

84. Do not expose the unit to high pressures.

85. Do not expose the unit to high temperatures.

86. Do not expose the unit to high moisture levels.

87. Do not expose the unit to high pressures.

88. Do not expose the unit to high temperatures.

89. Do not expose the unit to high moisture levels.

90. Do not expose the unit to high pressures.

91. Do not expose the unit to high temperatures.

92. Do not expose the unit to high moisture levels.

93. Do not expose the unit to high pressures.

94. Do not expose the unit to high temperatures.

95. Do not expose the unit to high moisture levels.

96. Do not expose the unit to high pressures.

97. Do not expose the unit to high temperatures.

98. Do not expose the unit to high moisture levels.

99. Do not expose the unit to high pressures.

100. Do not expose the unit to high temperatures.

101. Do not expose the unit to high moisture levels.

102. Do not expose the unit to high pressures.

103. Do not expose the unit to high temperatures.

104. Do not expose the unit to high moisture levels.

105. Do not expose the unit to high pressures.

106. Do not expose the unit to high temperatures.

107. Do not expose the unit to high moisture levels.

108. Do not expose the unit to high pressures.

109. Do not expose the unit to high temperatures.

110. Do not expose the unit to high moisture levels.

111. Do not expose the unit to high pressures.

112. Do not expose the unit to high temperatures.

113. Do not expose the unit to high moisture levels.

114. Do not expose the unit to high pressures.

115. Do not expose the unit to high temperatures.

116. Do not expose the unit to high moisture levels.

117. Do not expose the unit to high pressures.

118. Do not expose the unit to high temperatures.

119. Do not expose the unit to high moisture levels.

120. Do not expose the unit to high pressures.

121. Do not expose the unit to high temperatures.

122. Do not expose the unit to high moisture levels.

123. Do not expose the unit to high pressures.

124. Do not expose the unit to high temperatures.

125. Do not expose the unit to high moisture levels.

126. Do not expose the unit to high pressures.

127. Do not expose the unit to high temperatures.

128. Do not expose the unit to high moisture levels.

129. Do not expose the unit to high pressures.

130. Do not expose the unit to high temperatures.

131. Do not expose the unit to high moisture levels.

132. Do not expose the unit to high pressures.

133. Do not expose the unit to high temperatures.

134. Do not expose the unit to high moisture levels.

135. Do not expose the unit to high pressures.

136. Do not expose the unit to high temperatures.

137. Do not expose the unit to high moisture levels.

138. Do not expose the unit to high pressures.

139. Do not expose the unit to high temperatures.

140. Do not expose the unit to high moisture levels.

141. Do not expose the unit to high pressures.

142. Do not expose the unit to high temperatures.

143. Do not expose the unit to high moisture levels.

144. Do not expose the unit to high pressures.

145. Do not expose the unit to high temperatures.

146. Do not expose the unit to high moisture levels.

147. Do not expose the unit to high pressures.

148. Do not expose the unit to high temperatures.

149. Do not expose the unit to high moisture levels.

150. Do not expose the unit to high pressures.

151. Do not expose the unit to high temperatures.

152. Do not expose the unit to high moisture levels.

153. Do not expose the unit to high pressures.

154. Do not expose the unit to high temperatures.

155. Do not expose the unit to high moisture levels.
