Always follow the precautions of both levels because they are important to circumstances. Proceed in this manual carefully and pay full attention to safety to handle the product.

4.1 Installing the protective cover for oil

- Clean dirt off surfaces of the GOT and control panel.
- If necessary, add or remove oil or chemicals, remove the gasket (if necessary), and compensate when aligning with the panel.
- Make sure that the gasket of the GOT rear face is entirely covered.
- Do not push the protective cover for oil with pointed tools, including mechanical tools.
- Do not stretch or overbend the cover.
- When the protective cover for oil is used, the USB connector on the GOT front panel cannot be used.

TERMINAL (GOT)

4.2 Removing the protective cover for oil

- The protective cover for oil is used in the operation of the installation procedure.
- The protective cover for oil is removed in the reverse of the installation procedure.
