Cautions on Safety

In order to handle this product correctly, thoroughly read this manual and the detailed manuals introduced in it, and observe the following precautions. Note that the cautions here apply to this product in isolation.

For details on safety of the PC system as a whole, refer to the manual for the CPU unit. The cautions in this section are true for both modules; that is, "CL-A" and "CL-A1H", according to their importance.

**CAUTION**

A warning when improper operation could result in a dangerous situation causing death or serious injuries.

A caution when improper operation could result in a dangerous situation causing minor injuries or physical damage in the module itself.

Even if you observe a caution mark, you may still have a serious accident depending on the situation. Do not fail to follow the cautions.

1. GENERAL DESCRIPTION

This manual gives the规格, system settings, and method for installing the AY7-TJAP/ATAR/ATAR Directory Data Link Units to the AY7-TJAP/ATAR Directory Operation Terminal (hereafter abbreviated to GOT).

The AY7-TJAP/ATAR Data Link Units are installed to the GOT when the GOT is used as a local station in the MEILSECNET (MK) optical/copper data link system.

**CAUTION**

**CAUTION**

- Do not touch the terminals while they are live. This will cause malfunctions.
- Switch the power off before changing the module or replacing the terminal modules. This will cause malfunctions.

**CAUTION**

- A bay that is not used should be turned off. This will cause malfunctions.
- Switch the power off before changing or replacing the modules.
- Do not connect or disconnect modules while they are connected. This will cause malfunctions.
- The unit shall be installed horizontally. If it is not, it may malfunction, develop faults.
