2. Battery Replacement

- For the replacement procedure, refer to the User's Manual of the respective Devices with Built-in Batteries.

3. Battery Life and Date of Manufacture

- Battery life: Approx. 5 years, when IU2-3M10(L) or IU2-1EMES is used, it is about 3 years. (ambient temperature: 25°C)
- Replacement period: Within 4 or 5 years, when IU2-3M10(L) or IU2-1EMES is used, it is about 2 years. (Due to natural discharge within all batteries, please prepare a replacement before the above-stated replacement period.)

4. Precautions for Battery Transportation

When transporting lithium batteries, follow the transportation regulations.

- Comply with IATA Dangerous Goods Regulations, IMDG code and the local transport regulations when transporting products listed above. Also, consult with the shipping carrier.

5. Handling of Batteries in EU Member States

- The symbol indicates that batteries need to be disposed of separately from other wastes.
- The new EU Battery Directive (2006/66/EC) requires the following when marketing or importing batteries and/or devices (left back of batteries in EU member states):
  - To print the symbol on batteries, devices, or their packaging
  - To explain the symbol in the manuals of the products
